

**Raiffeisen Group interim financial statement**  
as of 30 June 2006

**RAIFFEISEN**

**Raiffeisen's success story continues** Raiffeisen can look back on a successful first half of 2006, with operating income and gross profit all surpassing the record results of 2005. Gross profit stands at 487 million Swiss francs – an increase of 34 million Swiss francs (+7.5 percent) on the prior-year period.

**Earnings remain strong across the board** ■ Thanks to the continual rise in credit volume, the Raiffeisen Group achieved interest income of 887 million Swiss francs (up 4.3 percent on the prior-year period), despite a decline in interest margins.

The very satisfying results from commission business, service transactions and commercial business contributed to the desired broad-based earnings power. Income from commission business and service transactions rose by 16 million Swiss francs (+15.6 percent). The increase in earnings from securities and investment business (+28.7 percent) was particularly pleasing. Trading activities generated 51 million Swiss francs (+41.1 percent) in the first six months of the year – the highest ever half-year result.

**Moderate cost growth** ■ Expenses rose by 5.7 percent or 32 million Swiss francs, significantly below the prior-year figure (+8.9 percent). Personnel expenditure rose by 5.6 percent to 384 million Swiss francs. The number of people employed by Raiffeisen as of 30 June 2006 – on a FTE basis – was 6,571, an increase of 180 on mid-2005. Operating expenditure rose by 5.7 percent to 207 million Swiss francs. With expenditure on the renewal and expan-

sion of the IT infrastructure remaining constant, additional spending on marketing activities and investment in bank premises and security equipment played the largest part in the rise.

The cost/income ratio fell slightly and now stands at 54.8 percent (previous year: 55.2 percent).

**Profits scale new heights** ■ The pleasing earnings trend in interest business, commission business, service transactions and trading activities, coupled with the moderate rise in costs, resulted in a gross profit of 487 million Swiss francs (+7.5 percent). Since depreciation and provisions continue to fall, operating profit rose by 12.8 percent to 403 million Swiss francs (previous year: 357 million francs).

The extraordinary result was significantly lower than in the prior-year period, as the one-time special effects of the previous period (revaluation gains and sale of holdings) were not repeated. Group profit rose by just under 14 million Swiss francs to more than 320 million Swiss francs, making it the highest half-year result ever published.

\* The adjustment made in the last financial year to the rules for recording reimbursed expenses and fees for payment services has resulted in a restatement of the prior-year figures.

**Ongoing expansion of the core business** ■ As of 30 June 2006, loans to clients by the Raiffeisen Group amounted to 92.6 billion Swiss francs, with mortgage receivables accounting for 85.9 billion Swiss francs or 92.8 percent (+2.4 percent since 31 December 2005). Despite continued pressure from competitors, the growth rate of the previous year was maintained along with the high quality of the credit portfolio.

The proportion of fixed-rate mortgages reached a new record level of 67.2 percent (previous year: 66.4 percent). However, the changed interest rate environment of slightly increasing rates, particularly at the long end, has led to a significant decline in the shift to fixed-rate assets.

**Growth in client assets outpaces the market** ■ Although the bank savings market saw negative growth overall, Raiffeisen recorded an increase of 0.4 percent in the first half of the year. While liabilities to clients in the form of savings and investment deposits fell by 0.7 percent, there was an increase of 6.9 percent in medium-term notes.

Custody assets administered by Raiffeisen rose by 3.1 percent or 856 million Swiss francs to reach 28.5 billion Swiss francs. This increase was driven primarily by new money inflows into medium-term notes and structured products. Fund and equity volumes saw a slight fall due to the downturn in the second quarter.

Client assets under management reached 105.4 billion Swiss francs as of mid-2006.

The Raiffeisen Group's total assets stood at 116 billion Swiss francs as of 30 June 2006. The large increase (+7.2 percent) can mainly be attributed to the major expansion of interbank repo transactions and short-term investments by institutional clients.

Membership numbers rose by 33,149 or 2.5 percent during the first six months to reach a total of 1.34 million cooperative members.

**Positive outlook** ■ The Raiffeisen Group is optimistic about the future and expects the result for the full year to be slightly higher than the previous year's profit of 608 million Swiss francs. We are confident that our strategy of healthy growth and broad-based earnings strength will ensure the continued success of the Group.

*Every path, however demanding,  
starts with the first step.  
Raiffeisen accompanies its members  
throughout their journey.*
